

STURDY BEVERAGE BUDDY

The STURDY Beverage Buddy is designed to aid the recycling of used beverage containers such as cardboard coffee cups and plastic pint containers. The system allows all liquids and containers to be collected separately which helps with segregation at source.

The complete Beverage Buddy system is designed to fit neatly into a standard 240Lts wheel bin. This means the unit is extremely mobile and makes it easier for the user to transport it from place to place.

The system consists of a 240Lts Wheel Bin, a Liquid Collection Tank, a Container Collection Insert and a Funnel.

Using the Beverage Buddy is easy, simply pour any remaining liquid into the funnel and then dispose of the cup or container in the collection insert. The liquid flows directly into the collection tank where it is stored until emptying is required.

The Container Collection Insert allows for the collection of up to 800 beverage cups (10 stacks of approximately 100) while the Liquid Collection Tank stores up to 30Lts.

The Liquid Collection Tank is located at the bottom of the wheel bin and can be emptied through a drainage point on the back of the bin. The tank can also be easily removed to facilitate cleaning or replacement.

The funnel is covered by a stainless steel mesh to prevent any unwanted items such as cigarettes, chewing gum and other litter from passing into the liquid tank.

Should any liquid find its way into the Container Collection Insert, a drainage system has been designed to ensure that this liquid flow directly into the collection tank.
