# Citybac Bio

- not just a brown bin!

Citybac Bio is an exclusive wheeled bin that allows:

- Good preparation of bio-waste before composting;
- Reduction of the volume of waste being treated;
- Limitation of the production of bad smells;
- Improvement of hygienic storage conditions.

Available in  
140lt or 240lt sizes

### Functionality:

Designed for the collection of fermentable waste, *Citybac Bio* allows biological waste to be prepared well in view of composting and consequently a reduction in mass of up to 30%.

### Hygiene and Comfort:

The container's aeration system also limits the formation of gas, and thus bad odours. Odour nuisances linked to biological waste are considerably reduced naturally.

### Internal Grill:

The grill situated in the bottom of the bin is designed to allow for the collection of effluent water, favouring evaporation and therefore loss of matter.

An anti-bacterial additive incorporated into the container's material during its manufacture blocks the development of micro-organisms, notably on areas that come into contact with the user.

The *Citybac Bio* is recyclable!
