

STURDY SUPER BARRIER

High Visibility Traffic Management

The new Sturdy SUPER Barrier -
"Sometimes you just have to grow up
to come up to the mark"

Following on from the great success of the Sturdy Road Guard System we once again have come up trumps with the new Sturdy SUPER Barrier. Not only does the SUPER Barrier retain the same feature and benefits of the existing Road Guard it is now taller.

With the increase in safety on our building sites and roadsides there has been a huge demand from our customers for a higher more visible road barrier. When Sturdy Products investigated the market they found that contractors complained about the lack of safety for both motorists and pedestrians. The existing Road Guard was effective in most cases but there was still room for improvement when it was used on our major roads. The team at Sturdy Products put on their thinking caps to further develop the Road Guard System and have come up with an addition to the range - the new SUPER Barrier.

The new SUPER Barrier is different to the existing Sturdy Road Guard System due to its increased height. This boost in height has many benefits, which are listed below:

- The SUPER Barrier makes it harder for pedestrians and workers to climb over into unauthorised areas.
- The SUPER Barrier increases road safety as it prevents the glare from on coming cars crossing carriageways.
- Due to the enhanced height the SUPER Barrier is easily seen from a greater distance thus alerting on coming traffic to reduce their speed.

The new SUPER Barrier will be of great benefit to construction companies according to Mr. Declan Battle from SIAC Ferrovial. "As drivers approach road works they will be able to see the barrier in advance thus allowing them to reduce their speed accordingly. This will lead to less road accidents in construction areas. Also the M50 is a very congested area not just with vehicles but also with pedestrians due to its proximity to the LUAS. The higher barrier will deter people from jumping over into non safe areas".

For further information on our Road Barriers and our full construction range contact our sales team on **045 865044**, email sales@sturdyproducts.com or check out our website www.sturdyproducts.com
