

STURDY GRIT & SALT BUNKER RANGE

For a non-slip winter, install a STURDY Grit Bunker on your premises

The STURDY range of Grit and Salt Bunkers are manufactured from UV stabilised polyethylene plastic. This provides a robust product which will endure constant use in areas of high pedestrian traffic. The grit bunkers will not rust or rot and no painting is ever required.

The STURDY Range of Grit Bunkers have a wide opening to allow for ease of filling and for the extraction of grit, salt or sand.

The bunkers are ideal for roadside storage, car parks and company premises. An empty grit bunker is lightweight and can be easily moved into position by one person.

The top of each bunker is designed to prevent the collection of snow and rainwater while the hinged lid itself helps to protect the grit and salt from the elements. A lock can be fitted to the lid if required, but this is an optional extra.

The standard colour of the bunkers is yellow and as an option extra your company logo or signage can be printed on the product. 225kg Grit and Salt Bunker is ideal for use in shopping centres, car parks and areas of high pedestrian traffic.

STURDY 225kg Grit Bunker

Capacity: 9 Bag

Length: 985mm
Width: 595mm
