

# STURDY HIGH BACKED LAUNDRY TROLLEY

## FEATURES & BENEFITS

The Sturdy HIGH BACKED Laundry Trolley is unbeatable for price, functionality, durability and low noise. The body of the trolley is manufactured from UV stabilised medium density polyethylene material. The Compounded MDPE Material ensures that there is no colour give off.

The body is supported by a galvanised steel frame, with 4 non-marking low noise castors fitted on the underside. These castors can consist of Swivel, Swivel/Brake or Fixed. The tyres are of elastomer construction and are also fitted with a thread guard.

The high back on the trolley is specially designed for use in industrial laundries. Generally the trolleys are located under laundry exit chutes and the high back helps prevent spillage. The high back also allows laundry to be piled higher than standard trolleys, thus increasing the capacity.

The Sturdy HIGH BACKED Laundry Trolley is suitable for use in industrial laundries, and other industries where large quantities of materials need to be transported.

## OPTIONAL EXTRAS

- Bar codes for ease of traceability
